# EUROLUX SERIES

## SEMI-FRAMELESS ENCLOSURE

Splendor's EuroLux is the perfect marriage of a 3/8" inline panel and 1/4" door to create a unique frameless look. Unsightly headers and vertical posts found on standard enclosures are eliminated with the EuroLux series.

The EuroLux was designed specifically for baths lacking the proper wall support necessary for 3/8" installations including fiberglass inserts.

Options include eight different glass types and three metal finishes: Matte Black, Brushed Nickel, and Chrome.

# ENCLOSURES

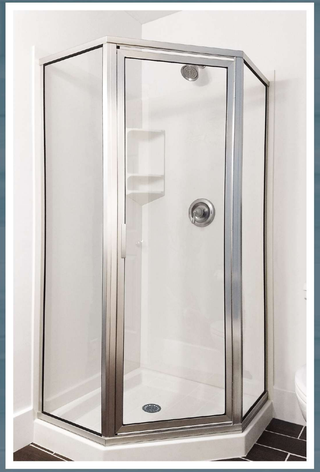
# **PREMIER** SERIES

## FULLY FRAMED ENCLOSURE

Splendor's Premier Series has a classic but highly functional contemporary look. This fully framed unit provides affordability and multiple design options. The Premier is available in twelve glass types and three metal finishes; Matte Black, Brushed Nickel, and Chrome.

The bottom unit features a reversible header and glass framed rails that give a different look with minimal effort. The curb of this unit has a simple design that is easy to keep clean and fantastic at moving water to the inside of the fixture.

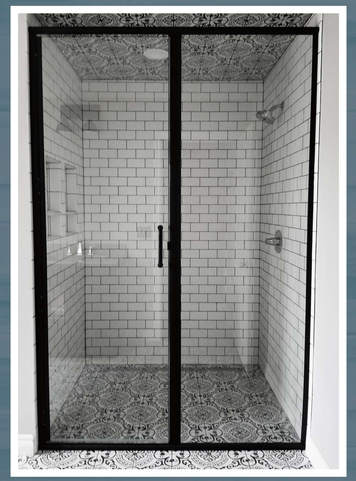
### TOWEL BAR BRACKET OPTIONS

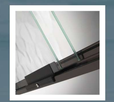


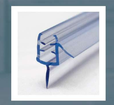
# **EURO** SERIES

## SEMI-FRAMELESS ENCLOSURE

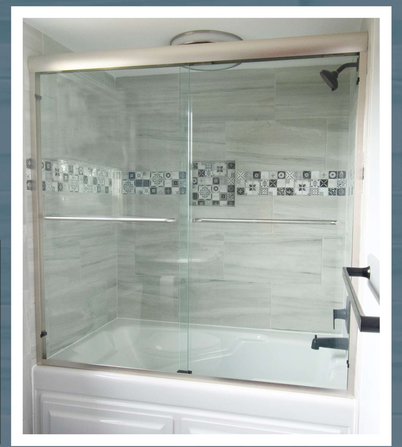
Splendor's Euro Series is a semi-frameless enclosure that creates an elegant and modern look. These enclosures utilize 1/4" glass and exposed polished edge work. The handles and towel bars featured in this series are tubular in shape and mount through the glass. This enclosure is available in twelve glass types. Metal finish options are Matte Black, Brushed Bronze, Brushed Nickel, and Chrome. The swing doors feature a 6 inch back-to-back standard pull and thicker glass with an exposed polished edge. A high-energy magnet closing system and unique bulb weather seal create a clean and water containing design.





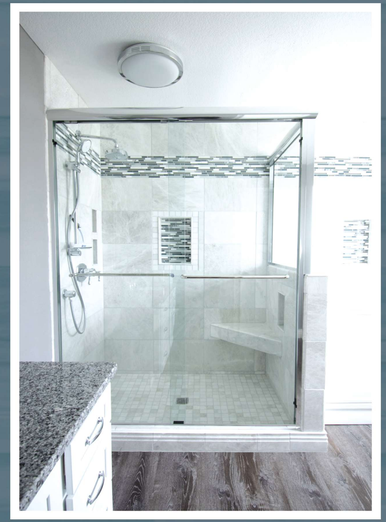


The sliders in the Euro series feature a rounded header to complement the tubular bypassing towel bars. These towel bars can be customized with knobs or handles to cater to the wants and needs of the customer. The curb on this unit is also simple in design, but very easy to keep clean.

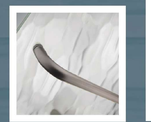


# **ELITE SLIDER** SERIES

## SEMI-FRAMELESS ENCLOSURE



The Elite Series Sliding door is ideal for the upscale bathroom equipped with a full–sized shower or bath tub, but a limited amount of space.

The upgraded 3/8" glass doors roll smoothly past one another on sturdy bearings that are mounted to a through glass hanger bracket. This creates a high end feel and the ability to create a taller shower enclosure than traditional standard units.


The panels come standard with towel bars, but can be accessorized with the hardware of your choice - from traditional to contemporary design options. This slider is available in eight different glass types and five hardware finishes; Chrome, Brushed Nickel, Matte Black, Brushed Bronze, and Brushed Satin Brass .
